Lexington 1568

LEXINGTON BOTANIC GARDEN STEPHEN F. HAMBLIN, Director

-:-:-

### THE LEXINGTON BOTANIC GARDEN

THIS garden is a major department of Lexington Gardens, Inc., and the purpose of it is to grow, test and display all the hardy herbaceous plants, of worth, that can survive the climate of Boston. Its area of display gardens covers over seven acres, and it is arranged to give a wide variety of garden types. There is a large Formal Garden, a Rose Garden of one acre, an Iris Garden, an Evergeen Garden, a Woodland or Wild Garden, and a Rock Garden of two acres. Also there are examples of Border Plantings, Bed Plantings, and nearly a thousand feet of Raised Border. This last is a flower border raised above the level of the walk by a rough stone wall. In the near future there will be a Water Garden and a Bog Garden. It is intended to maintain in this garden the most complete collection of hardy perennials to be found in this country.

Although owned and operated by a private corporation, it is open to the public, free, during all the daylight hours, and you are welcome to use the area for quiet recreation and study.

STEPHEN F. HAMBLIN, Director.

## RARE SHRUBS

Berberis triacanthophora (Threespine Barberry)	@1 FO	1
Tall, leaves narrow, evergreen, beautiful	\$1.50	each
Cytisus scoparius andreanus — A form of Scotch		
broom, with deep crimson wings on the yel-	A4 50	
low flowers	\$1.50	each
monspessulanus (candicans) — A tall broom		
to ten feet, with bright yellow, fragrant	<b>61 00</b>	
flowers in spring	\$1.00	each
Fothergilla gardeni (Dwarf Fothergilla)-Grow-		
ing to three feet, with showy terminal spikes		
of flowers looking just like bottle brushes,		
before the leaves. Unique; likes moist places	\$2.00	each
major (Large Fothergilla) (Bottle Brush)		
Grows to ten feet. Much like preceding only		
larger, with larger leaves, and flowers with	**	
the leaves	\$2.00	each
Hamamelis mollis (Chinese Witch-hazel)-Gold-		
en yellow in March	\$2.00	each
vernalis (Vernal Witch-hazel)-Orange-brown		
in March	\$2.00	each
Hydrangea sinensis (Chinese Hydrangea)- Tiny		
blue flowers with blue rays. A hardy Blue		
Hydrangea	\$1.00	each
Indigofera decora (Chinese Indigo) - Flowers		
white to pink	Not R	eady
gerardiana (Himalayan Indigo-Rose, in erect		,
clusters		
kirilowi (Kirilow Indigo)—Large pink flowers	\$2.50	each
potanini (Potanin Indigo) — Deep pink to white	\$1.50	each
Lonicera spinosa (Thorn Honeysuckle) — A dense	A1 05	
spiny shrub	\$1.25	each
syringantha (Lilac Honeysuckle) — Flowers		
of lilac color and fragrance	\$1.25	each
syringantha wolfii (Wolf Honeysuckle) - Flow-		
ers purple, larger	\$1.00	each
thibetica (Tibetan Honeysuckle)-Similar to		,
syringantha	\$1.00	eacn
Pyracantha coccinea lalandi (Laland Firethorn)	<b>AA</b> AA	. 1.
Evergreen; orange fruits	\$2.00	eacn
Prunus subhirtella (Higan Cherry)— A beauti-		
ful little tree, to 25 feet, that has become dif- ficult to find. The flowers of a rosebud pink		
ncult to find. The nowers of a rosebud place		
-		
come before the leaves in great profusion.

Vitex agnus-castus (Lilac Chaste-tree)— Lilac or
white
macrophylla (Bigleaf Chaste-tree)—Dark blue,
very beautiful \$ .75 each negundo incisa (Cut-leaf Chaste-tree)—Finely
cut foliage Not Ready
RARE ROCK GARDEN SHRUBS
Chosen as rock garden subjects because of their compactness
and their propensity to remain small
Azalea amoena — The Kurume Azaleas and their kin are wholly hardy and the most colorful of little shrubs
Benigiri — Scarlet red \$3.00 each
Christmas Cheer — Deep red \$6.50 each
Daybreak — Light pink\$7.50 each
Himamayo — Soft pink \$2.25 each
Snow — Pure white \$4.00 each
Others may be procured
Berberis gagnepainii (Black Barberry) — Nar- row, toothed, evergreen leaves \$2.25 each
juliane (Wintergreen Barberry)—Large leaves,
more robust than Box\$1.50 to \$2.00 each
sargentiana (Sargent Barberry) — Leaves very
thick and spiny \$3.00 each
verruculosa (Warty Barberry)—Like a spiny
dwarf Box; silvery white below; wholly hardy; like miniature Holly (large plants)
\$2.50 to \$3.00 each
Calluna vulgaris (Heather) in many forms
vulgaris alporti — Crimson \$ .75 each
vulgaris compacta — Very dwarf \$ .75 each
vulgaris flore pleno — Double flowers \$1.00 each
vulgaris searlei — White \$ .75 each Cotoneaster microphylla (Rockspray) — Smallest
species, evergreen\$1.25 to \$1.50 each
microphylla thymifolia (Thyme Rockspray)
Leaves and fruit even smaller \$1.50 each
Cytisus austriacus — A dwarf broom from Aus-
tralia, to three feet, flowers bright yellow, in July and August \$1.50 each
leucanthus (Albus) (Pale Broom) — Flowers
creamy white to pure white in summer \$ .75 each
nigricans (Spike Broom)-Racemes long and
slender; yellow \$1.00 each
purgans (Provence Broom) — See this dwarf broom in the Arnold Arboretum in June; a
wonderful sight with its mess of yellow.
Racemes short, dense \$1.00 each
purpureus albus-carneus — A procumbent type
with pink and white flowers (very rare) \$2.00 each
supinus (Big flower Broom)—Rather procum- bent with large terminal heads of yellow
flowers
Euonymus radicans minimus (Baby Winter-
creeper)-Smallest of hardy evergreens \$ .75 each
radicans acutus (Sharpleaf Wintercreeper)
Creaping like Vinca minor \$ .75 each

Creaping like Vinca minor...... \$ .75 each radicans coloratus (Purple Wintercreeper) Whole plant tinted red; creeper...... \$ .75 each

Genista germanica (German Broom) — Green- twigged little shrub with yellow pea flowers;		
best in driest and sunniest spots hispanica (Spanish Broom)— Dense, spiny,	\$1.00	each
with yellow flowerheads mantica — Low growing form of tinctoris	\$1.00	each
(Woodwaxen)— Bright yellow flowers ovata — Grows to three feet, with yellow flow-	<b>\$ .7</b> 5	each
ers in short racemes pilosa (Silky-leaf Broom)—A prostrate form	\$1.00	each
with yellow flowers from May to July sagittalis (Arrow Broom)—Very tiny, with	\$1.00	each
winged twigs Hypericum buckleyi (Buckley St. Johnswort)	\$1.00	each
A rare American shrub, a few inches high, with clouds of yellow flowers in summer	\$ .50	each
Ilex crenata microphylla (Littleleaf Japanese Holly) — Resembles small-leaved Box; black		
berries\$2.50 to Leiophyllum buxifolium (Box Sandmyrtle) — A	\$3.00	each
sort of tiny white evergreen Azalea buxifolium prostratum — A prostrate form of	\$1.00	each
the above, not over three inches high Lonicera pileata (Privet Honeysuckle — A tiny		each
evergreen shurb with delicately fragrant, creamy-white flowers	\$1.00	each
Pachistima canbyi (Canby Pachistima) — Ever- green groundcover. The best ever\$ .50 to	\$.75	each
Philadelphus microphyllus (Littleleaf Mock- orange)— Tiny species from the Rockies;		
very fragrant. A few at Rhododendron ferrugineum (Rock Rhododendron)	\$1.50	each
Growing but still too small to sell		
hirsutum (Garland Rhododendron)-Still very small		
Rosa spinosissima (Scotch Rose)—Rose, white and yellow; the small sorts are in scale with	01 FO	
other rock plants\$1.00 to Spiræa lucida — A midget form of spiræa van-		
houttei, growing only about two feet Viburnum opulus nanum (Dwarf Cranberrybush) Best deciduous shrub for very dwarf effects.	<b>эт.</b> 00	each
Best decideous shrub for very dwarf effects.	¢ 75	oach

Beautiful foliage. Never more than  $2\frac{1}{2}$  feet \$ .75 each

#### ROSES

The display garden of hardy climbers and bush roses contains already more than 1000 varieties. Most of these may be procured through dealers at current prices (average of \$1.00 each). Our own seedlings and forms from old gardens will be propagated on request. For many new forms loaned by American breeders, their special permission for propagation must be obtained. Harison Lemon and Harison Salmon, two of our seedlings of Harison Yellow, in lemon and salmon. Registered A. R. S. 1930...... \$2.50 each

We have a few climbing roses which we can furnish from our own stock:

American pillar — Single pink with white eye \$ .75 each Dr. Van Fleet — Double flowering pink; de-

lightful sort ...... \$ .75 each Paul's Scarlet Climber — Brilliant scarlet ..... \$ .75 each

Silver Moon — Pure white, semi-double \$ .75 each Primrose — The new pure yellow, as yet quite rare; but the best yellow, holding its color until the petals drop \$1.50 each
RARE PERENNIALS and the MORE CHOICE COMMON KINDS
Note: — In this list those plants that are preceded by a star (*) are adaptable to the Rock Garden
*Acæna (New Zealand Bur)— Neat rock plants of beautiful fine foliage, valuable as a groundcover, prostrate or
trailing. *ovalifolia — Leaves large, finely compound, flowers in globose stalked heads with pur-
plish-red spines\$ .50 each *sarmentosa—Foliage somewhat smaller, flow-
ers less conspicuous \$ .50 each *Aconitum wilsoni — A rare and beautiful vari- ety of Monkshood, of strong, stately habit,
five to six feet in September. Flowers of a lovely light violet-blue \$ .75 each
*Ajuga (Bugle)— A ground cover for banks or bare spots in the rock garden. Flowers of deep blue or blue-violet
<ul> <li>*metallica crispa — With crisp, curly, metal- like foliage\$ .35 each</li> <li>*multicoloris — Foliage splashed with many - bright, bronzy shades like bits of watered-</li> </ul>
silk\$ .35 each *reptans — The common Buggle, foliage green,
flowers blue \$ .30 each *Allium carrinatum (Keeled onion) — Nodding purple clusters of interesting and delightful flowers in summer. Fragrant, but do no cut,
for the stem is true onion\$ .30 each *Alyssum rostratum — Bright yellow flowers in
dense heads in June and July \$ .30 each *saxatile sulphureum — Pale creamy yellow flowers, much softer in color than the raw
<ul> <li>wers, inder softer in color than the raw</li> <li>yelfow types\$ .35 each</li> <li>*spinosum (Bush Alyssum)— A tiny shrub,</li> <li>eight to ten inches high, spiny flowers white</li> <li>or pink. A necessary addition to the rock</li> </ul>
garden \$ .50 each *Anchusa myosotidiflora (SiberianBugloss)—Blue forget-me-not-like flowers in spring, 10 to
14 in. high. Very distinctive and desirable \$ .40 each *sempervirens (Evergreen Bugloss)— Laven- der-blue flowers in July with fairly wide
<ul> <li>leaves, nearly evergreen\$ .35 each</li> <li>Anemone hupehense (Chinese anemone) — More</li> <li>dwarf and earlier than Japanese Anemones,</li> <li>18 to 24 in., producing an abundance of</li> <li>rose-mauve flowers from August until late</li> </ul>
autumn. Delightful \$ .30 each *pulsatilla (Pasque Flower)— Spring bloom- ing rock plant, eight to ten inches high,
with large violet or purple flowers \$ .30 each
*pul. alba — A white form \$ .35 each *pul. rubra — A dark red form, very attractive. \$ .35 each

*Aquilegia crysantha (Golden Columbine) — Gold- en yellow with long spurs
<ul> <li>*chry. alba — A white form of the above \$ .30 each</li> <li>*Long spurred hybd. — Large flowers in delicate shades that include all colors of the</li> </ul>
spectrum \$ .30 each *Long spurred pink — Beautiful pink shades of
the long-spurred group \$ .30 each *viridiflora (Siberian Columbine)—A rare spe-
cies from Siberia. Although not showy is very charming and of delicate fragrance \$ .50 each *Arabis albida (Rockcress)—Six to ten inches high with clusters of fragrant white flowers
suitable for the border but best among the rocks of the well or rock garden \$ .30 each *a. rosea (Rose Rockcress)— A form of albida
with soft rose colorings \$ .40 each * <i>aubretioides</i> (Aubretia Rockcress)— Flowers of faintest orchid-pink, a worthwhile addi-
tion to any rock garden \$ .40 each *pumila (Pigmy Rockcress)— A very dwarf
sort, flowers white \$ .35 each *sturii — Very compact with clusters of large
pure white flowers. Extremely rare \$ .75 each Aster Barr's Pink — New England type, four to
five feet high, with beautiful pink flowers. NEW—the best pink yet\$ .60 each Queen Mary—New York type, three to four feet high, large yet graceful flowers, blue
tinted lavender, 2½ in. across, arranged loosely in branching panicles \$ .60 each Sam Banham — New York type, large white
flowers in long feathery sprays \$ .35 each Aster Wonder of Stæfa — A hybrid, dwarf, 18 to 24 inches high, with pale blue flowers, large in size but of a light, airy quality. Exceed-
ingly beautiful. Very limited \$1.00 each Novæ-anglæ albus — The white New England Aster, not at all common \$ .40 each
*Arenaria grandiflora — A Sandwort from the Pyrenees; smothered with snow-white, star-
like flowers in May \$ .35 each Artemesia Silver King (Ghost Plant)— A deli- cately showy plant growing to about three
feet, lending a silvery haze to the garden picture, making a subject for Claude Monet \$ .30 each Belamcanda chinensis (Blackberry Lily)—Old-
fashioned but rare. Lily-like, orange and black-spotted flowers on slender stems about 30 in. high, followed by large black seeds
resembling Blackberries \$ .35 each
Boltonia latisquama nana — The best of the Bol- tonias, pale lavender-pink flowers and about four feet high\$ .30 each
Campanula - A large and extremely interesting group. We
have over 50 named species growing in the test beds, but are able to offer but a few of that number this year.

*garganica (Gargano Harebell)— A compact little plant with pale blue flowers in branch- ing racemes, rather pendant. A noteworthy				
plant for the wall or rock garden lactiflora Josephine — Flowers of pale blue in	\$	.40	each	
giant panicles coming in mid-summer persicifolia backhouseii—Improved white flow-				
ering form of the Peach-leaved Bellflower p. moerheimi — Very large semi-double snow- white flowers, a beautiful border plant, fine			each	
for cutting <i>p. Telham Beauty</i> — Magnificent bells of beau-	Ċ		each	
tiful china blue * <i>petiolata</i> — A beautiful plant of the rotundi- folia type; the plants here were alive with bloom all summer and late into the fall until the ground was frozen solid. Truly a	\$	.40	each	L
remarkable plant; limited number *portenschlagiana (muralis)—(Wall Harebell) From Dalmatia comes this dwarf, evergreen	\$	.75	each	ı
kind, a dense tufted growth with pale blue flowers in August and September <i>punctata</i> (Spotted Bellflower)— Upright grow- ing plant with interesting bluish-white flow-				
ers, spotted with purple inside	\$	.30	each	ı
p. alba - A rare white form of the above				
<ul> <li>p. Marian Gehrig — Large lilac-blue flowers</li> <li>*pusila — Dainty rock type with pale blue flowers and shiny green leaves; blossoms all</li> </ul>	\$	.50	each	1
summer	\$	.40	each	ı
$*pusila \ alba$ — This white form is very limited				
and, of course, very desirable *rotundifolia (Harebell)— The Blue Bell of Scotland, rather pendant true-blue flowers,	\$	.60	each	1
ten to twelve inches high. Best suited to the				
rock garden	\$	.30	each	ı
*r. alba — Pure white form; elegant *raineri — Dwarf, sturdy plants, three to six			each	
inches high, each shoot bearing a large, dark blue flower. A gem from the Alps of				
North Italy *sarmatica — Pale blue in flower, very distinct	Ċ		each	
dwarf species. We have only a few to offer *Chrysanthemum articum (Arctic Daisy)—A good	\$	.50	eacr	1
rock garden plant, little more than a foot high, single white flowers tinged with lav-	\$			
ender coreanum (Korean Daisy)— A taller growing		.30	eacr	1
sort, two to three feet daisy-like plant, with masses of rosy-white flowers in late fall; excellent for cutting, or very showy in the				
border	\$	.30	each	1
Chrysanthemum hortorum - The garden Chrys				
We have selected only those that flower ear complete satisfaction in their bloom before	ly	and		
Boston — Golden bronze, pompon type Carrie — Canary-yellow, Aster type				
Cranford White — White with gamboge blush				
Summer Gold Very early flowering, Gol pompon		n y	ellow	V

Winetka - White, Aster flowering

Wolverine - Beautiful yellow, incurved flowers

Any of above for 30c each, or one each of the six kinds for \$1.50

Barbara Cumming - Clear yellow

October Girl - Bright pink, semi-double

Gypsy Girl — Beautiful coppery-crimson, nearly single

- Ruth Hatton Ivory-white with lemon flush, pompon Ruth Cumming — Rich crimson-bronze shaded with terracotta
- Any of the above five are 50c each, or one each of the five kinds for \$2.00
  - \*maximum BURBANKS FRILLED The best of the Shasta Daisies. Triple row of fluted white petals about a golden center, just like a Walter Raleigh, ruffled collar about a shining, upturned face. To see it is to want it. New and rare. At home in either the border or rock garden ...... \$ .60 each

### \*Cimicifuga racemosa (Black Snakeroot) — Long racemes of white blossoms, one to three feet long on stems three to eight feet high. Best for dark corners or shady woodland gardens, summer flowering ...... \$ .35 each

- foetida simplex (Kamchatka Bugbane)—Very rare species, more attractive than, but not so tall as "racemosa," creamy white flowers close-knit on slender racemes, tall flowering \$1.00 each
- Clematis davidiana A bushy plant of handsome foliage, with fragrant pale blue flowers tubular in shape, but in clusters or whorls; three feet......\$ .35 each integrifolia — Small but erect-growing bushy plants, with interesting and delightful porcelain-blue flowers from June to August \$ .50 each recta — Large clusters of pure white, fragrant flowers during June and July. Rather showy \$ .40 each
- Convalaria majalis Common Lily of the Valley; clumps ......\$ .60 each rosea — Extremely rare; like the common in growth and fragrance, but the flowers are
- of a soft rose shade; small clumps...... \$1.25 each Coptis Asplenifolia (Fern leaf Gold Threat) Best for the moist, shady places of the rock or woodland garden (Japan)...... \$.35 each
- Delphinium cashmerianum A dwarf species with pale to deep blue flowers...... \$ .50 each tatsieniense — A dwarf bushy form of the Chinese type, covered with brilliant blue
- flowers for a long time during the summer. Makes a good rock garden plant. Expressed in modern slang, it is a "Wow"...... \$1.00 each *pictum muscodorum* — Has not flowered here yet, but many have wanted it for its striking, glossy foliage, which gives off a strong odor of musk (From the Mediterranean

regions)...... \$ .60 each Delphinium (Wrexham strain)— A new race of the Hollyhock type. Many beautiful named kinds have sprung from this selection. As fc1 colors, we cannot give any guarantee ....... \$ .75 each

<ul> <li>Extra — We have many species of Delphiniums which, though botanically differing one from the other, are for practical purposes, too much alike to catalogue by name. We offer good flowering plants of these, unnamed, at 30c each or \$2.50 per dozen.</li> <li>*Dianthus alpinus (Alpine Pink) — A charming</li> </ul>
little alpine with pure pink flowers in great abundance; grows not more than 4 in. high \$ .50 each
barbatus (Sweet William)— White, double white, "auricula" \$ .25 each
*cæsius (Cheddar Pink)—Makes compact little tufts of silvery-green foliage with tiny but pretty and fragrant flowers thrust out on slender stems, the whole looking like dainty little pin-cushions
*cæsius grandis (Large Flowering Cheddar Pink)
like the type but with more showy flowers \$ .40 each knappii (Yellow Pink)—Slender, of Sweet William habit, a long bloomer and really
yellow in color \$ .75 each
*Dianthus superbus (Lilac Pink)—A delicate fringed variety with lavender pink flowers \$ .30 each
superbus nanus (Baby Lilac Pink) \$ .35 each
*species mixture — We have many species of Dianthus,
many kinds which are of the "plumarious" type, but include other kinds such as "gigantens," "pontederæ,"
"præcox," balbsie," "zonatus," "pungens," "tenir," "bo-
naticus" and many others. Some unusual and many
charming ones to be found among them. These we can
sell, unlabeled and mixed, for 25c each or \$2.00 per doz. *deltoides (Maiden Pink)— Masses of dainty
pink flowers on the rock garden \$ .30 each
*deltoides albus — A white variety \$ .30 each
*deltoides brilliant—Improved type, rosy crim-
son\$ .30 each Four each of the deltoides group, 12 for \$3.00
*Dicentra formosa (Western Bleeding Heart) Small plant with dainty fern-like foliage with drooping racemes of pale rose flowers, from spring through the summer. A dwarf
Bleeding Heart \$ .35 each spectabalis (Bleeding Heart— No description is needed for this old-time favorite of the
garden, flowering from May through July \$ .75 each *Doronicum caucasicum (Caucasian Leopardbane) Bright yellow daisies, single, on long straight
stems, about a foot high. Border, or where
the soil is richest in the rock garden; stands
some shade, May and June \$ .50 each excelsum (Showy Leopardbane) — Magnifi- cent yellow daisies, very showy in May and
June, about 2 to $2\frac{1}{2}$ feet \$ .40 each
*Epigæa repens (Trailing Arbutus)— The true
Mayflower \$ .40 each Eupatorium coelestinum (Mist Flower)—A perennial "Ageratum," blossoming from
August until heavy frosts\$ .35 each *Filipendula hexapetala fl. pl. (Double Dropwort) Large clusters of beautiful creamy-white
flowers, 18 to 24 in. high, in June and July \$ .40 each

ulmaria fl. pl Large and dense panicles of
double pure white flowers, from June to August\$ .35 each
*Gaillardia grandiflora — Beautiful crimson and
gold daisies throughout the summer, grow-
ing to two feet, for the border or larger
rock garden \$ .30 each
*portola — Brilliant improvement over common
types, colorings more refined. Good for cut flowers\$ .35 each
Gypsophila paniculata (Bristol Fairy)—A great-
ly improved form of the double Baby's
Breath. Large masses of misty white,
throughout the summer \$ .50 each
*Helera baltica (Baltic Ivy)-Similar to Eng-
lish Ivy, but much more hardy \$ .75 each *helix (Lexington special)— A type of small-
er-leaved English Ivy that grows without
protection in Lexington \$ .75 each
Helenium autumnale (Sneezeweed)-Huge um-
bels of golden yellow flowers atop 4 to 6
foot stems in late August and September \$ .30 each autumnale pumilum (Dwarf Sneezeweed)—si-
milar to above, only on stems that are not
more than two feet high \$ .50 each
autumnale Riverton Beauty - Pure lemon-
yellow with large disc of purplish black, three to four feet\$ .35 each
autumnale Riverton Gem — Old gold suffused
with bright terra cotta; really the richest
color in the late summer and autumn; beau-
tiful, three to four feet \$ .40 each
autumnale rubrum — Deep maroon in color, with a slight suffusion of dark terra cotta.
A real dusky beauty. Four feet in the fall \$ .40 each
hybridum Crimson $Beauty - A$ dwarf form
that blooms all summer; not quite so dark
in color as rubrum, but darker than River-
ton Gem. A very beautiful and valuable addition to this group; 2 to 2½ feet \$ .60 each
*Helianthemum (Sun Rose)— We have about 20 species and
varieties of this beautiful little rock plant, some of
which are offered below:
Ball of Fire — Double, maroon
Citrinum — Single, yellow Double orange — Double, bright orange
Macranthum — White
Mrs. Earle — Double, red
Multiflorum — Orange-pink
Rhodanthum — Single, pink, silvery foliage Rhodanthum Carneum — Flesh-colored
Rosy Gem — Rose-pink
Rose Queen - Rose, silvery foliage
Any of the above \$ .35 each
Helianthus scaberrimus Wooly Dod - One of
the best fall blooming sunflowers; large quantities of yellow flowers, on stalks that
reach six feet\$ .30 each

Heliopsis scabra formosa (False Sunflower)				
Rich yellow, semi-double flowers in great				
profusion throughout the summer; very				
striking; grows two to three feet	\$	.50	each	
scabra gratissima — A good yellow-ocre vari-	Ċ			
ety, 2½ feet	\$	.40	each	
zinniaflora — Extra large, semi-double yel-				
low flowers, three inches across, grows				
two to three feet				
Hemerocallis (Day Lily) - We have many specie				
and desirable varieties on display here, but I few of the more common types to offer this y			niy a	
flava — Lemon Day Lily; May and June	ea	r:		
(fragrant)	\$	35	each	
fulva — Tawny Day Lily; deep orange to	Ψ	.00	caen	
crimson, June and July	\$	.30	each	
Kwanso fl. pl Double orange, July				
thunbergi-Buttercup yellow; July; fragrant				
Heuchera, Pluie de Feu (Alum Root)- Deep				
coral, very brilliant	\$	.40	each	
Rosamundi - Bright coral pink, profuse				
bloomer	\$	.50	each	
Other Heucheras — a few divisions of many on	æ	50	<b>1</b> .	
display here may be purchased at	þ	.90	each	
*Hosta lancifolia alba — This pure white form of				
the small Funkia is very desirable. We have an extremely limited quantity at	e.	1 00	each	
lancifolia tardiflora — Pale lavender, like lan-	φ	1.00	each	
cifolia, only flowers a month later, in late				
September and October	\$	.30	each	
*Hypericum buckleyi (Buckley St. Johnswort)	Ċ			
A shrubby American plant six to eight				
inches high, with clouds of yellow flowers in				
summer	\$	.50	each	
repens — A prostrate type from Asia Minor,				
with beautiful foliage and bright yellow				
flowers; very charming	\$	.50	each	
*Iberis sempervirens "Little Gem" (Dwarf Ever-				
green Candytuft)- White flowers entirely				
covering the plant in May and June, six				
inches high. Best in the rock garden or as an edging	¢	۶ <b>0</b>	anah	
sempervirens "Snow Flake" — Early flower-	φ	.50	each	•
ing, with larger flowers like giant snow-				
flakes	\$	.30	each	
tenoreanum — A more uncommon species,				
flowers white to pale lavender rose	\$	.50	each	
Incarvillea delavayi - Trumpet Flower, rosy-				
violet trumpet-shaped flowers	\$	.50	each	
Iris — The many species have not been sufficien	tly	che	ecked	
to offer at this time.				
Lilium dauricum (Candlestick Lily) — Flowers				
upright and of a deep red-orange tenerifolium (Coral Lily)—Showy little droop-	\$	.50	each	
ing flowers of a bright coral red in July;				
$1\frac{1}{2}$ to two feet high	\$	.40	each	
*Linum campanulatum (Bell Flower Flax)— The	Ψ		Sacii	
only really hardy yellow. Those who saw it				
in flower here last summer wanted it, but				

we had no surplus to offer then. We shall	Ф <b>4</b>	0 aa ah
have a few ready by spring at *perenne (Perennial Flax)— Wavy masses of	ф.4	Jeach
small, clear blue flowers, best for the rock- ery	\$ 3	0 each
*perenne album (White Perennial Flax)		
Limonium latifolium elegantissimum (Giant		
Great Sea Lavender) — Great feathery		
heads of flowers like a lavender mist; two	• •	
feet high		0 each
Lobelia cardinalis (Cardinal flower)	\$.3	) each
syphilitica alba (Large White Lobelia) Best companion for cardinal flower	\$ 3	) each
*Lychnis alpina (Arctic campion)— Tufted foli-	φ.0	, caci
age, purplish-crimson flowers; for the rock		
garden	\$.3	5 each
*alpina alba — A more uncommon white form		
*viscaria (Rose-pink Campion) — A tufted va-		
riety with deep pink flowers. Rock garden.		
May and June *viscaria splendens — A rosy red form of the	\$.30	0 each
above	\$ 3	0 each
* <i>walkeri</i> — A hybrid with carmine red flowers,	φ.0	5 cacin
from June to October	\$.5	0 each
*Leiophyllum buxifolium (Box Sandmyrtle) - A		
sort of tiny evergreen Azalea with white		
flowers, very desirable for the rock garden,		
not over 18 inches high	\$1.0	0 each
<i>buxifolium prostratum</i> — A prostrate form of the above making a little evergreen mat not		
over three inches high	\$1.0	0 each
*Mentha requieni (Corsican Mint) - Diminutive	·	
creeping ground cover with pale purple		
flowers; strongly scented of peppermint	\$.4	0 each
Monarda bradburyana - A native of Central	\$.4	0 each
Monarda bradburyana — A native of Central U. S., with pink to whitish flowers spotted		
Monarda bradburyana — A native of Central U. S., with pink to whitish flowers spotted with purple: to two feet		0 each 0 each

Pachysandra procumbens (Alleghany Spurge)
Better than Japanese Spurge (Pachysandra
terminalis), native although uncommon in
cultivation. An excellent ground cover, but
not quite evergreen\$ .50 each \$4.00 doz.
Pxonia albiflora — Here are a few of the older forms which
will always be desirable; others we can procure
through special dealers.
Albert Crouse — large rosy white flecked with
crimson (late) \$ .75 each
Felix Crouse — rich ruby red, double (mid-
season) \$1.00 each
Duchess de Nemours — sulphur white, cup-
shaped, fragrant (early) \$ .75 each
Livingston — soft lilac rose tipped with silver,
double (late) \$1.00 each
Mons. Jules Elie - large flowers, pale lilac
rose with silvery reflex (mid-season) \$1.00 each
Officinalis rosea — Double rose (early) \$1.00 each
Officinalis rubra—double deep crimson (earli-
est) \$1.00 each
Walter Faxon — Beautiful rich soft pink; one
of the best pinks (mid-season) \$3.00 each
Pæonia species — We have planted seeds of many species,
but it will be some time before the plants can be
checked up for trueness, etc., and be made available
to you.
Papaver orientale — We have a few kinds available of this
popular and showy perennial:
Gerald Perry - Apricot-pink; blotched crim-

flower late in May and continuing throughout the summer.

mer.
Charlotte — Pale pinkish-lilac with purple eye \$ .50 each
Emmy — Orchid with deeper orchid eye \$ .50 each
Hanna — Bright pink with purple sheen \$ .50 each
Hilda — white suffused with light orchid and
having a pink eye \$ .50 each
Louise - Pale orchid with light carmine eye \$ .40 each
Marianna — Dark, bluish violet \$ .50 each
Collection six kinds — one each of above for \$2.50
The following phlox are particularly adapted to the rock
garden:
0
*Phlox argillacea (Sand Phlox)—Pale orchid,
of habit of canadensis \$ .50 each
*brittoni (Britton Phlox)- Of Subulata type,
white with red eye, starlike. Very desirable \$ .50 each
*multiflora (White Alpine Phlox) — Tiny plant
with large, fragrant, rosy flowers \$ .40 each
*ovata (Mountain Phlox)—Wide evergreen
leaves with rosy lavender flowers \$ .40 each
*pilosa (Down Phlox) — Like phlox argillacea
only it is taller and leaves are down \$ .40 each
*subulata rosea (Moss Pink) — Rose-pink, just
one mass of bloom in April\$.30 each
*subulata sensation - Pale orchid, flowers in-
termittently throughout the summer \$ .40 each
*Phlox subulata snow — Smothered in pure white
bloom like a snowy "hangover" from the
vivid - Rich, bright rose; the best of the
group for color \$ .40 each
One each of the above nine rock garden phlox
for \$3.00; two each, \$5.50; three each, \$8.00

*Primula elatior (Oxlip) — Large yellow flowers in many flowering umbels \$ .40 each
*Pulmonaria saccharata (Bethlehem Lungwort or Bethlehem Sage)—Large showy oval leaves, dark green, spotted with white. Flowers are like those of mertensia, but coming later. The attractive foliage persists
all summer; about one foot \$ .50 each
Rudbeckia laciniata salicifolia (Willow-leaved Golden Glow)— Stately spires of pure yel- low flowers in the second half of summer,
six feet or more tall\$ .35 each speciosa (Showy Coneflower) — Large orange- yellow flowers from July to October, about
three feet \$ .30 each Salvia azurea (Azure Sage)— Racemes of pret- ty sky-blue flowers in August and Septem-
ber, three to four feet \$ .30 each azurea grandiflora (Great Azure Sage)— A
more beautiful compact form of the above \$ .35 each
ulignosa (Bog Sage)-Probably the best of
all the sages. A stately plant to six feet,
with long racemes of sky-blue flowers in
August \$ .40 each
Salvia species for the Herb Garden. We have in the test beds over 20 species, of which there is a surplus of the
following ten:
Salvia bracteata rosea — Rosy purple
cærulea — Blue
cleistogama (clandestina) — Lavender-blue
globosa — White to lavender
glutinosa — Yellowish
montbretii — Blue
officinalis - Purple to blue
pratensis — Blue; leaves spotted with red
verbenaca — Blue or white
verticillata — Lilac blue
These apparently were true in the check-up last summer,
but before the re-check this summer we cannot be absolutely sure of them, so they are offered not guar- anteed, at 25c each, or the collection one each of ten for \$2.00.
<sup>*</sup> Santolina incana (Lavender Cotton)— Valuable
for its silvery-grey foliage. A sub-shrub, to
two feet, yellow flowers \$ .30 each
Satureia nepeta (Savory)— Another herb not unlike nepeta musini in habit and flower \$ .40 each
Saxifraga (Rock Foil) — Tufted little plants, specially
suited to the wall or rock garden. Those we have in
the garden and test beds have not blossomed yet, so
we could not check their trueness to name. There is a

surplus of the following, but until summer they must remain among the uncertainties.

Aizoon - Grey-silvery tufts, encrusted, flow-

ers creamy white, marked with purple (probably true) ...... \$ .40 each cæspitosa — Tufted flowers, milk white; small

conifera — Densely tufted, leathery leaves, flowers white

decipiens — Tufted, flowers white to rose, $\frac{1}{2}$
inch across
geranoides - Tufted, flowers white, small
moschata rhei - Flowers rose-colored
muscoides — Densely tufted, flowers pale yel- low
<i>pedemontana</i> — Tufted flowers, white and rather large
rotundifolia — Leaves kidney-shaped in ros-
ettes, flowers white, splotched with red or
purple, medium large
Any of above, excepting aizoon, sold without
guarantee \$ .30 each
*Sedums — None of the smaller succulents offer such true variety as the Sedums. There is usually sufficient dif-
ference in foliage alone that $\epsilon$ ven an amateur can
distinguish many of the species. We have over 100
kinds in the rock garden. Most of them have been
checked as true, others remain without positive identi-
fication as yet. There seem to be no duplicates among
them; that is, two alike with different names. Of these
plants there is sufficient surplus to release a few of each. Price from 25c to 75c each.
A collection of 100 different named varieties for \$30.00
50 for
25 for
*Sempervivum — Over 50 species in the rock gar-
den, but as yet not thoroughly checked in
bloom. Unlike the Sedums, the foliage dif- ference is too slight, if any, to distinguish
many of them. We prefer not to release any
until we are sure of their identity; but if
you can't wait some of their children are
yours, not guaranteed, for \$ .25 each
*Sternbergia lutea (Fall Daffodil) - A rare and
hardy bulbous herb from the southern Alps; beautiful yellow, crocus-like flowers, in Sep-
tember and Ocaiber \$ .50 each
*Silene alpestris (Alpine Catchfly)—Dwarf, to
six inches, very showy, glistening white
panicles of flowers, from June to August \$ .40 each
*flavescens - Tufted plant to eight inches,
large, bright yellow flowers, solitary or in pairs\$ .40 each
*petræa (saxifraga)— Tufted plant, to ten
inches, flowers whitish, in small panicles \$ .30 each
*pennsylvanica (Wild Pink) - Native, tufted
perennial, to eight inches; beautiful, rosy-
red flowers from April to June \$ .50 each
*wherryi (Wherry Pink) — Native, but rare; soft rose flowers; lovely \$1.00 each
*Solidaga cutleri — A dwarf golden rod for the
rock garden, from Mt. Washington \$ .30 each
*Thalictrum alpinum (Apline Meadow Rue) from
the Arctic regions, to one foot high; flow-
ers are the bright yellow stamens\$ .50 each
fendleri (Fendlers Meadow Rue)—to three feet, flowers with whitish sepals \$ .40 each
*Thymus serpyllium (Mother of thyme)— Flow-
ers purplish

*Thymus — (continued)
*rosemum — Flowers rosy red
*coccinium — Flowers crimson
*languinosum (Wooly thyme)— Downy grey foliage
*citriodorum (Vulgaris) Lemon thyme)-Gold-
en variegated foliage, with strong odor of
lemon verbena Any of Thymes \$ .30 each
Trollius europæus Orange Globe - A free bloom-
ing Globe Flower, with large globular flow- ers of deep golden orange from June through
August, for the border\$ .50 each superbus — Beautiful pale yellow blossoms;
otherwise like Orange Globe\$ .50 each
Verbascum Chaixii album — A really perennial
mullein, with spires of white flowers with
purple wooly stamens; very stunning, to three feet\$ . 40 each
nigrum — Similar to chaixii, three or more
feet, with yellow flowers that have purple
throat and violet-wooly stamens. These add
"snap" to any border \$ .40 each
Veronica (Speedwell)-A large and interesting family of
blue flowers (infrequently white, and rarely red), ranging from the very tiny creeping "repens" of one
inch, to the more stately "longifolia subsessilis" that
frequently attains three feet. It is a group that guar-
antees blue in the garden practically all summer. This
is one of the "genus" of which we hope to have a com-
plete collection, and have made a very good start with a surplus of the following:
*allionii — Prostrate, to three inches, very dark
green leaves, flowers pale blue-violet, in
spike-like racemes \$ .35 each
austriaca — To two feet, flowers large, in long
racemes, blue \$ .40 each *caucasia — To six inches, flowers white, veined
with violet \$ .50 each
*chamædrys-To 1½ feet, flowers blue in long,
slender racemes, June and July \$ .35 each
*exaltata (spuria exaltata)—To two feet,
panicled racemes of deep blue flowers, very desirable \$ .40 each
*erica — A pink form, flowers like spikes of
Irish Heather \$ .40 each
gentianoides — Pale blue flowers, veined with
darker blue, in long, loose racemes \$ .40 each
*incana (Wooly speedwell)—Light grey foliage
with spikes of rather deep blue flowers, July \$ .30 each
longifolia (maritima)— Two or three feet, flowers lilac in dense racemes, July to Sept. \$ .35 each
longifolia subsessilis — Like above, with deep blue flowers \$ .40 each
*orchidea — Similar to chamædrys, with pale
orchid flowers, June and July \$ .35 each
* <i>peduncularis</i> —Prostrate flowers, white veined with rosy lavender\$ .50 each

*repens — Moss-like, to three inches, with blue flowers, early April and May \$ .35 each
* <i>rupestris</i> — Dense spikes of pale blue flowers,
May and June\$ .35 each
*rupestris trehani — Like ruprestis, only foli-
age is golden yellow \$ .35 each

"American Rock Gardens," by Stephen F. Hamblin (Orange Judd Co., 15 East 26th St., New York City). \$1.25. Or post-paid from Lexington Gardens, \$1.35.

"Get Rare Plants from Lexington Gardens, Inc."

#### LABELING

While extreme care is taken to label all plants correctly, in the process of growing 20,000 different varieties of perennials, — from many foreign sources, — mistakes are likely, and in some cases it will be necessary to carry plants for many years under the name received. Each plant will be sold by the name under which it is grown in the display garden, until study of the plant and the opinion of botanists makes another name preferable.

#### PRICES

These prices are entirely retail, that this garden service may be self-supporting. Only the surplus plants may be sold. We cannot yet make prices for any greater quantities than the dozen. Six plants may be had at the twelve rate. Unless otherwise stated, twelve plants sell for the price of ten, e.g. plants that sell for 30c each are \$3.00 per dozen; for 35c each, \$3.50 per dozen; 40c each, \$4.00 per dozen; 50c each, \$5.00 per dozen, etc. Prices include packing.

#### SHIPPING

Plants will be shipped from the time planting season opens, about April 1, until it closes, about October 15, in the sequence of the receipt of the order. Care will be taken in packing to insure the arrival of the plants in good order. Unless specified otherwise, plants will be shipped by American Express, Collect. Those who wish their goods via Parcel Post should include (from New England, New York, New Jersey, Pennsylvania, Delaware and Maryland), five per cent of the order price for postage; from other states, ten per cent.
